> CINCINNATI, Dec. 15 .- Gen. Michael Ryan president of the Cincinnati Abattoir Com-Association, is just back from Washington, where he held a conference with President Roosevelt and other officials regarding the proposition to have the packers themselves pay for the Government inspection of meat Gen. Ryan said to-day: "The impression I gained from the con

ference in Washington was certainly that the Government would continue paying for this inspection. I was practically assured that no change would be made at the present session of Congress. I have reported to that effect to the Packers' association. said: "The market is strong and firm as to

demand and prices. As the demand is fully up to the supply right along there is no indication of any marked change for some time to come. tional Hardwood Lumber Association, ex-pressed himself to-day concerning the movement in Congress to investigate the alleged

trust in America. I know of three large hold meetings and go through the form of fixing prices, but they are utterly unable to enforce with their membership an adherence to the price lists laboriously brought forth at these conferences. "These three organizations are the National

Hardwood Manufacturers' Association, the Southern Lumber Manufacturers' Association, which handles yellow pine exclusively, and the Southern Cypress Lumber Association. The lists agreed upon and printed are simply a sort of basis for the members to refer from \$1 to \$3 below the printed price list per

from \$1 to \$3 below the printed price list per thousand feet."

President T. J. Moffett of the Cincinnati Lumbermen's Club said:

"It does not seem to me that the hardwood interests, such as predominate in this market, are involved. It seems probable to me that the proposed probing is of the soft wood or pine interests of the South."

The lumber market continues very active for the season, although the continued car shortage handicaps it considerably.

Four local distillers will engage in the manufacture of denatured alcohol for commercial uses, following the recent modification of the ruling of Internal Revenue Commissioner Yerkes.

Secretary W. L. Finch of the Cincinnati Industrial Bureau has just returned from Washington and New York, where he investigated the practicability of instituting a system of attracting desirable immigrants to this city. He says that the dearth of labor in Cincinnati is growing more and more pronounced and he believes the manufactarers could use \$,000 more men than they now have in their employ. Secretary Finch will formally recommend that a trial be given such a system of drawing from the multitudes of immigrants continually landing.

Heavy Demand for Tin Affects Iron and Steel Market-Orders for Rails Fall Off, but Output of 1907 Is Already Well Sold Up-Demand for Scrap.

PITTSBURG, Dec. 15 .- An advance of 10 cents a box on tin plate was scheduled, effective December 12, for the Pittsburg district, but for some reason announcement was deferred. The order is expected to be issued within a few days. This will be the second advance within two months. On October 25 sheets were advanced \$2 a ton and tin plate 15 cents a box. Sheets are practically \$2 a ton higher than the established price, as premiums in that amount or more are paid for early delivery. The new price of tin plate will be \$4

The principal feature of the iron and steel markets this week is the unprecedented conditions existing in the sheet and tin plate trade. It is customary to close many mills at this season of the year, but plants are being operated as fully as the supply of steel will permit. The American Sheet and Tin Plate Company is operating all of its sheet mills, 165 in number, and all but twenty-one of its 253 tin plate mills. The idle works are: Humbert at Connellsville, Pa., 6 mills. Morewood at Gas City, Ind., 7 mills, and Anderson at Anderson, Ind., 8 mills. These plants have not been on the operative list for eighteen months and no effort is being made to put them in condition, as it is difficult to get the steel needed to supply the plants already running. The independent producers of time plate and sheets are only prevented from perating to capacity on account of inability o get steel, but most of them are operating

in fairly good shape.

The leading interest and many independents are booked up on sheets to April 1 and into the second quarter. In tin plate sales have been made through the second and into the third quarter. It has been the practice in former years to store tin plate at this season of the year for the usual brisk spring trade, but while production is greater then ever before stocks are not being accumulated. Specifications on old contracts during the last few weeks have been unusually heavy and shipments would have been greater but for the shortage of railroad cars.

As most of the sheet and tin plate mills are operated under the sliding wage scale of the Amalgamated Association of Iron, Steel and Tin Workers it is likely the workers will paricipate in the higher prices when the next bimonthly adjustment is made in January. The base of the tin plate scale is \$3.40 a box and wages are advanced 2 per cent, with every increase of 10 cents a box in the price over the base.

Every important line of finished steel prodicts except structural material has been advanced within the last two months, and two advances have been made in steel pipe and vire and wire products. The heavy buying of structural material a few weeks ago was believed to be due to an expected increase in price, but it is not likely that any change will be made officially, as the mills are sold up to the third quarter and some through the year, the demand of steel car and shipbuilding interests being unprecedented. For early delivery premiums are freely paid, and range from \$2 to \$3 a ton.

There has been a gradual decline in the placing of orders for steel rails, but the bulk of the business for 1907 has already been booked. The Carnegie Steel Company, which has been receiving contracts for some time past aggregating on an average about 30,000 tons weekly, this week booked but 8,000 tons of standard sections and 3,000 tons of light steel rails. The Illinois Steel Company and the Colorado Fuel and Iron Company are supposed to be sold up for the entire year, as contracts from Western roads have been received by the Carnegie Steel Company in the last month.

The recent advance in prices of plates and steel bars is of little benefit to producers as most of them are sold up at the old rates to July 1. Specifications are heavy and mills are unable to take care of them owing to the car shortage. Deliveries are hard to get and premiums are offered for prompt shipment. The recently established price for plates is 1.70 cents, but the Eastern mills last week made another advance and are quoting 1.80 cents f. o. b. Pittsburg. In the West prices of steel bars are much lower, some mills quoting at a rate equal to 1.55 cents Pittsburg. The scarcity of pig iron hus resulted in an past aggregating on an average about 30,000

quoting 1.80 cents f. o. b. Pittsburg. In the West prices of steel bars are much lower, some mills quoting at a rate equal to 1.55 cents Pittsburg.

The scarcity of pig iron has resulted in an increased demand for scrap and dealers are asking stiff prices. Consumers refuse to pay the prices quoted and several important deals are being held up owing to inability to agree on a satisfactory rate. The Sharon Steel Hoop Company has been the largest buyer of heavy melting scrap during the last three weeks, having contracted for fully 18,000 tons, paying \$19 for 5,000 tons and from \$19.50 to \$20 for the rest. Two months ago \$16 was regarded as a high price for heavy melting scrap. Another large interest bought 2,000 tons last week at \$19.50 and is in the market for more but declines to pay a higher price. The Carnegie Steel Company also is in the market for heavy melting and bundled sheet scrap but so far has been unable to buy the material at the price it is willing to pay.

There is no change in the pig iron market, as the furnaces are sold up to July 1 and consumers are not ready to place contracts for the second half. The only sale of the week of any consequence was \$60 tons of bessemer sold by the Bessemer Pig Iron Association for delivery in the first quarter at \$23, valley furnaces. There is some demand for spot iron, but producers cannot furnish any iron unless it is taken from consumers that placed orders long ago. Southern and Virginia furnaces also are sold up and many are behind in deliveries on account of the carshott was expected that active buying for the

Virginia furnaces also are sold up and many are behind in deliveries on account of the car shortage.

It was expected that active buying for the second half would begin about December 1, but outside of about 50,000 tons of malleable bessemer, 30,000 tons of which came from a Western car wheel interest, about 17,000 tons of bessemer and 25,000 tons of basic, there have been no transactions of importance. Producers a few weeks ago named \$21,25 for bessemer and \$21 for basic, f. o. b. valley furnaces, but these rates were not attractive. This week \$21 is quoted for bessemer and \$20,75 for basic. Consumers evidently have decided to wait for lower prices and producers are not ready to make any concessions, as sales at a less rate for July might interfere with high prices for iron contracted for June delivery.

Pig iron freight rates have been advanced in the South 25 cents a ton. The rate from the Virginia furnaces will take effect on January 1 and from the Birmingham district on February 1. It is reported that a similar advance is to be made from the valley furnaces to Pittsburg, which will increase the present rate of 85 cents to \$4.05, cents a ton. The rate from Birmingham to Pittsburg will be increased from \$4.60 to \$4.85 and from the Virginia furnaces to Pittsburg from \$4.55 \$2.80 a ton.
